Doing task 2

-----------------------------------group member task 2 -----------------------|

Development Technology
<h3>Front-End:</h3>
- HTML, CSS, JavaScript
- React (Front-end framework)
- Map integration libraries (e.g., Leaflet) for location-based features
- Responsive design for mobile and desktop devices

<h3>Back-End:</h3>
1. Node.js or Python (Server-side scripting)
2. Express.js (Web application frameworks)
3. MongoDB or PostgreSQL (Database management)
4. Geocoding APIs (for mapping and location data)

Features
- Search: Easily search for dining establishments based on location,
cuisine, price
range, and more.
- Restaurant Profiles: Detailed profiles for each restaurant,
including information
about the cuisine, operating hours, contact details, and customer reviews.
- Menus: Access to digital menus, helping users explore dishes before
visiting the
restaurant.
- Reviews and Ratings: Read and write reviews and ratings to share
experiences with
the community.
- Map Integration: Integration with mapping services to provide
directions to the
selected restaurant.
- User Accounts: Create accounts to save favourite restaurants,
track dining history,
and receive personalized recommendations.
