Local Dining Guide

Web Based Dining Information Solution

Welcome to the Local Dining Guide project! This web-based software solution is designed to provide users with comprehensive dining information, making it easy for them to explore and discover local restaurants, cafes, and eateries. Whether you're a food enthusiast looking for new culinary experiences or a traveller seeking the best dining spots in town, Local Dining Guide has got you covered.

Branch name pattern *

main

Protect matching branches

☑ **Require a pull request before merging**
When enabled, all commits must be made to a non-protected branch and submitted via a pull request before they can be merged into a branch that matches this rule.

☑ **Require approvals**
When enabled, pull requests targeting a matching branch require a number of approvals and no changes requested before they can be merged.

Required number of approvals before merging: 1 ▾

☐ **Dismiss stale pull request approvals when new commits are pushed**
New reviewable commits pushed to a matching branch will dismiss pull request review approvals.

☑ **Require review from Code Owners**
Require an approved review in pull requests including files with a designated code owner.

☑ **Require approval of the most recent reviewable push**
Whether the most recent reviewable push must be approved by someone other than the person who pushed it.

Doing task 2

```
-----------------------------------group member task 2 -----------------------|
## Development Technology
<h3>Front-End:</h3>
- HTML, CSS, JavaScript <br>
- React (Front-end framework) <br>
- Map integration libraries (e.g., Leaflet) for location-based features <br>
- Responsive design for mobile and desktop devices <br>

<h3>Back-End:</h3>
1. Node.js or Python (Server-side scripting) <br>
2. Express.js (Web application frameworks) <br>
3. MongoDB or PostgreSQL (Database management) <br>
4. Geocoding APIs (for mapping and location data) <br>

## Features
- <b>Search:</b> Easily search for dining establishments based on location,
cuisine, price
range, and more. <br>
- <b>Restaurant Profiles:</b> Detailed profiles for each restaurant,
including information
about the cuisine, operating hours, contact details, and customer reviews.
- <b>Menus:</b> Access to digital menus, helping users explore dishes before
visiting the
restaurant.<br>
- <b>Reviews and Ratings:</b> Read and write reviews and ratings to share
experiences with
the community.<br>
- <b>Map Integration:</b> Integration with mapping services to provide
directions to the
selected restaurant.<br>
-  <b>User Accounts: </b> Create accounts to save favourite restaurants,
track dining history,
and receive personalized recommendations.<br>
